### Placche "antisalinità"

L'installazione in ambienti soggetti all'influenza del mare (ad esempio le imbarcazioni) o con presenza di soluzioni saline, può provocare, alle normali placche, un precoce deterioramento della verniciatura. Per ovviare a questo problema Ave ha inserito le "placche antisalinità" che, grazie ad un rivoluzionario processo di verniciatura, garantiscono una maggior resistenza nel tempo alla finitura originale. Ave offre la possibilità di avere questo trattamento solo sulle seguenti 5 colorazioni: bianco Banquise (BG), bianco Blanc (BP), cromo (CR), ottone (TT), radica (RD). Modalità di ordinazione: indicare nell'ordine, dopo il codice della placca desiderata, "con trattamento antisalinità".

### Anti-salinity front plates

The installation in environments close to the sea (for example the boats) or where salt solutions are present, can cause a premature deterioration of the paint in normal kind of front plates. In order to solve this problem, Ave proposes the anti-salinity front plates: thanks to a revolutionary process of paint, they guarantee a greater resistance through the time. Ave can offer this special paint in the following colours: Banquise white (BG), Blanc white (BP), Chrome (CR), Brass (TT), Briarwood (RD). How to order them: indicate on your purchase order "with anti-salinity treatment" after the front plate code.
